The Civil Aviation Organization of Islamic Republic of Iran

Head of IT Department

June 2017 - September 2017 (4 months)

The Civil Aviation Organization of Islamic Republic of Iran (CAO.IRI), (Persian: سازمان هواپیمایی کشوری جمهوری اسلامی ایران) is Iran's civil aviation agency. It is the statutory corporation which oversees and regulates all aspects

of civil aviation in Iran. The organization was established in July 1946 and investigates aviation accidents and incidents in Iran

Taftan Airline

IT Consultant

June 2017 - August 2017 (3 months)

UTab Gasht

IT Manager

December 2014 - June 2017 (2 years 7 months)

Utab Gasht Airline Agency started its work in year 1392 with concentration on tourism with special offers for governmental organization and private institution. As the manager of IT department, my responsibility was to make the base and bedrock of every work for all the staff of the complex. Among my services were providing cable connections, website designing and services for online reservation.

I did my best, to provide the best services with the lowest price. After the year 1393 and due to my close relationship with the managers of the complex, besides my work in IT and technical problems, I started to do all the administrative jobs in commercial department. In this time all my effort was on creating methods for attracting new customers based on computer-based services in tourism. And as a result, we were very successful in the tourism exhibition in year 1395.

Finally, in year 1396, due to working on other projects, I didn't have any more the chance to work with the mentioned agency. I wish the best for the agency and am really happy that someday I've been a part of this company.
